An aerial photograph of a vast, dense forest with a thick canopy of green trees, filling the entire frame. The perspective is from a high angle, looking down on the forest floor.

A CLASSIC REBORN

QUERKUS®

Oak—nature's most beloved wood—has shaped interiors for centuries as the preferred choice of designers and craftspeople alike. Its texture tells the tales of seasons past, of sunlight filtering through ancient forests, of warmth and endurance, offering a sensory connection that transcends time.

With Querkus, Decospan honours the timelessness of oak while embracing innovation. This is not just a revival — it is a transformation, crafted to meet contemporary needs, it preserves the essence of nature by sourcing from well-managed forests.

The result is a perfect balance: oak's authentic texture enhanced through nature-inspired finishes, paired with the tactile experience that only real wood can provide. Querkus invites both the eyes and fingertips to discover its remarkable character.

NATURE IS TEXTURE

QUERKUS®

Every grain and nuance is a chapter written by time — a canvas touched by sunlight, rainfall, wind, and the earth itself. Texture reveals what words cannot: a timeless dialogue, honest and full of life.

With Querkus, we honor oak's living masterpiece, drawing you into spaces where each surface holds its own revelation — where essence becomes experience, and beauty emerges from nature's unrepeatable touch.

Because nature is texture — and texture is character.

The advantages of Querkus

TEXTURE AT YOUR FINGERTIPS

Querkus reveals oak's hidden character through slicing patterns, jointing and brushing techniques that honour the wood's natural feel. This tactile quality interacts with light, creating dynamic shadows that shift throughout the day and connect us to nature's ever-changing rhythms. The result is a veneer with authentic texture and depth—transforming ordinary spaces into extraordinary environments.

NATURAL HARMONY

Querkus celebrates the natural beauty of oak and combines it with today's and tomorrow's expectations in interior design. Through our craftsmanship, we honour this natural elegance while respecting customer's demands for homogeneous, surfaces. The result? An intimate dialogue between nature and design.

EARTH TONES WITH ATTITUDE

The expanded Querkus palette draws inspiration from nature's grounding elements. These sophisticated, timeless hues complement both traditional and modern settings, whilst unburdening projects for millworkers, designers and end users through transparency and ease-of-use. Each tone has been thoughtfully developed using a complex colour finish without adding uncertainty or complexity in the process.

NATURE FOR TOMORROW'S GENERATION

Wood is one of nature's most impressive materials, with each piece carrying a story of time, place and life. Querkus selects only oak sourced exclusively from well-managed forests and reclaimed timber, uniting responsible stewardship with history and craftsmanship to showcase the pinnacle of what nature can create—so future generations can enjoy the beauty and richness of nature as we do today. It is our promise to protect what truly matters, now and for generations to come.

Natura

The Querkus Natura showcases the warm, honest elegance of untouched natural oak. It invites you to craft your own finish, adding your personal touch to create interiors as timeless as the oak itself.

Querkus Natura is also available in Infinite: veneer that overcomes the natural limits of wood, offering perfect consistency in grain and colour—scalable for even the largest, most demanding projects.

Product overview

Querkus stands for beautiful and decorative oak veneered panels. Captured in 18 looks, it represents the variable textures of nature in an accessible and easy-to-process product. An honest collection to make your project unique.

Top-notch Top layer

The top layer of the Querkus panels consists of an expertly crafted sheet of wood veneer. Every sheet is composed using our mixmatch technique, yielding unrivaled consistency and uniqueness.

What is mixmatch?

Mastered over decades, this signature technique provides an uniform surface. Various slicing techniques are applied to select timber cuts from different trees, which are then joined together into a sheet. Each panel is characteristically unique to solid wood without visual inconsistencies or structural compromises.

Which version should you choose?

Querkus panels are available in 3 versions: Exclusive, Select and Basic.

EXCLUSIVE: The very best that Querkus has to offer. Both sides of the panel have Querkus quality veneer, for the most harmonious look available.

SELECT: Querkus quality veneer on the front side. The back has the same wood specie as the front but allows more character and does not specify the jointing method. This version is recommend when only 1 side of the panel is visible e.g. cubbords, tables, ...

BASIC: Querkus quality veneer on the front side. The back is the same woodspecie but allows a lot of character in the veneer. This version is recommended when the backside is not visible e.g. wall covering.

How to finish Querkus?

Querkus is a collection of pre-sanded panels, flexes, sheets, edge banding, slats and coustics that allow for further finishing. It is important to sand the panels again before finishing to achieve the needed adhesion and facilitate the finishing process.

The collection can be finished with varnish or oil. The wood can also be stained prior to finishing. We recommend following the instructions of the varnish/oil supplier for further finishing.

Finishing instructions can be found through on the Querkus website.

3050 x 1220 mm (10 x 4 ft)
Thickness: 0.6-1.0-1.5 mm
2800 x 2070 mm (9 x 6,5 ft)
Thickness: 0.6 mm
2500 x 1240 mm (8 x 4 ft)
Thickness: 0.6-1.0-1.5 mm

Panel

A HIGH QUALITY PANEL, FROM CORE TO SURFACE

Querkus panels consist of two layers of veneer and an 18 mm-thick MDF or chipboard. A veneered panel always needs a backing to guarantee the maximum stability of the panel. The table below shows the possibilities.

Versions:

		EXCLUSIVE frontside and backside		SELECT frontside backside same wood species, allowing more character, jointing technique not specified.		BASIC frontside backside same wood species, all character allowed, jointing technique not specified.

3000 x 1240 mm (9.8 x 4 ft)
Thickness: 0,6 mm

Flex

OAK WITH UNPARALLELED FLEXIBILITY

Querkus Flex is a veneer layon that is very easy to work with. The veneer layon is first pressed onto paper and the wood fibres are then broken. This results in a flexible sheet of wood veneer allowing for application on curbed surfaces.

The glueing of the top- and paper layer is done with a formaldehyde-free glue. Querkus Flex cannot be delivered with filled knots.

Applications: curbed surfaced (max radius 50 mm, flexible pressing on other surfaces, doors, edge banding, ...

3000 x 1240 mm (9.8 x 4 ft)
Thickness: 1 mm

Sheet

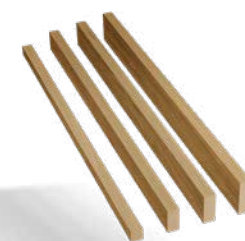

A SOLID BASE FOR CHALLENGING FINISHES

Thin sheets for applications where lamination on alternative substrates is needed. The sheets are provided with a firm paper-backer, which makes the sheets easy to manipulate and glue without any problem.

Applications: flexible pressing on other surfaces, doors, edge banding, ...

Veneer 24 or 48 mm x 100 m
(15/16" or 1-7/8" x 328 ft)

31 x 31 x 3040 mm (1-1/4" x 1-1/4" x 9' 11-5/8")
31 x 65 x 3040 mm (1-1/4" x 3-3/4" x 9' 11-5/8")
31 x 80 x 3040 mm (1-1/4" x 3-1/8" x 9' 11-5/8")
31 x 96 x 3040 mm (1-1/4" x 2-1/2" x 9' 11-5/8")

Edge banding

THE PERFECT EDGE FINISH

Querkus edge banding comes standard in 0,6 mm veneer and in 2 widths for all looks. The Natura references Adagio, Allegro and Vivace are also available in 1 mm veneer. Edge banding assures a refined finish to your interior.

Slats

ENDLESSLY VERSATILE BEAMS

Astrata slats are veneered beams with MDF core for wall and ceiling applications. The smallest beam is finished on 3 sides, making it ideal for flush mounting against a surface. The other formats are finished on 4 sides and be used to build striking room dividers.

Astrata slats perfectly match Querkus Adagio & Allegro.

2500 x 585 mm (8' 2-7/16" x 1' 11-1/16")
3030 x 585 mm (9' 11-5/16" x 1' 11-1/16")
Thickness: 22 mm (7/8")

Coustics

WOOD THAT CAN HOLD ALL YOUR SECRETS

Astrata Coustics are veneered acoustic panels for walls and ceilings, composed of black MDF with a felt backing. They offer a stylish solution for sound-absorbing requirements.

Astrata coustics are available in two formats and perfectly match Querkus Adagio & Allegro.

To enhance the natural beauty of oak we always recommend Querkus panels with brushed finish, this highlights the grain structure and gives the veneer a tactile dimension.

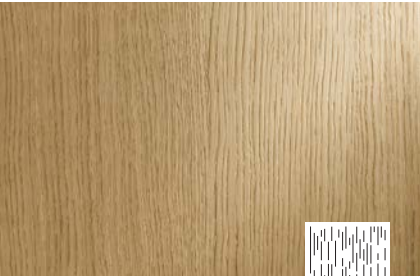

Brushed

Brushed B1: the soft summer wood is given a subtle and light brush treatment. Brushed B1 is possible to apply both single or double-sided.

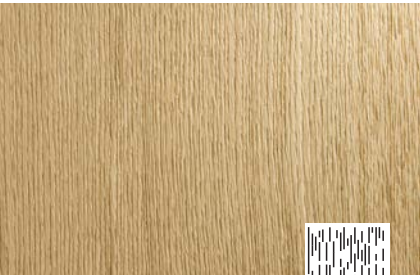

Brushed B2 and B3: the structure can be seen more in depth, with the effect being comparable to sand-blasting. Brushed B2 and B3 must always be applied double-sided for panel stability.

Brushed B1

Brushed B2

Brushed B3

Plain

These panels are pre-sanded as standard with 120 grit. The surface is smooth and and should be further sanded and finished.
